

THE CABIN

Sydney

■ Welcome

The Cabin Sydney specialises in providing modern and effective outpatient addiction treatment.

The first of its kind in Australia, The Cabin Sydney is a specialist addiction treatment centre focussing on substance addictions, such as alcohol and drugs, and process addictions including gambling, sex and the internet.

The Cabin Sydney employs an integrated counselling model combining the most effective evidence-based treatment methods, delivered by experienced professionals.

Located conveniently in the centre of Sydney, we offer flexible treatment programmes to fit the work and lifestyle commitments of our clients.

Demanding work and family life often prevent people from seeking the treatment they need. Unfortunately, addiction will not go away on its own and typically gets worse over time. With this in mind, The Cabin Sydney has developed a treatment programme to effectively tackle addiction on an outpatient basis. Each client receives an individualised treatment plan to address their unique needs. Programmes include a combination of the following:

- One-on-one Addiction Counselling
 - Group Therapy
 - Family Programme
 - Complimentary Therapies, e.g. Mindfulness
 - Psychiatric Assessment and Medication Review
 - Follow up and Continuing Care Programme
-

■ Our Team

The team at The Cabin Sydney is comprised of fully licensed, highly skilled addiction experts with years of experience providing top quality care to clients.

■ Our Method

Our addiction treatment programme offers customised and effective treatment options that can be scheduled around clients' work, school and personal obligations.

The Cabin Sydney's integrative treatment model **Recovery Zones**, treats both substance and process addictions by combining core elements of the 12 Steps, cognitive behavioural therapy (CBT) and mindfulness meditation. This approach has been proven to successfully combat addiction.

■ Intensive Outpatient Programme

The Cabin Sydney's outpatient treatment programme caters to clients' individual needs as identified during our clinical assessment. Clients attend various 60-minute group sessions as well as 50-minute individual sessions, one to three times per week, according to their specific treatment plan. Intensive treatment with a combination of group and individual work has been found to effectively help clients overcome addiction.

Groups Offered:
